

PREMIER

FOAM LIFEJACKET ↓

Since its introduction in July 2010, the Crewsaver Premier lifejacket has lead the way in passenger and crew lifejacket safety. The first lifejacket to be approved to ISO 200(80), the Premier has since gone on to be the choice of both the largest Cruise ships and some of the most discerning superyachts and commercial vessels worldwide.

With a design brief that stipulated ease and intuitive donning, mirroring the hugely successful original Premier (over 750,000 units sold), the Premier uses a patented "Reverse Angle Head Support" to achieve the vital in-water performance that the regulations require.

The unique design of the neck opening allows for increased wearer comfort, while durability is assured by the use of tried and tested quality components.

FEATURES

- MED APPROVED LIGHTS
- OPTIONAL SPRAY HOOD
- DONNING INSTRUCTIONS
- AVAILABLE IN ADULT, CHILD AND INFANT SIZES
- HIGHLY VISIBLE COLOUR WITH SOLAS APPROVED RETRO REFLECTIVE TAPE
- BUDDY LINE AND WHISTLE STORED IN RECESSED POCKET
- WAIST BELT DESIGNED TO FIT CHEST GIRTH OF 1750MM
- SACRIFICIAL STITCH AT THE END OF THE WAIST BELT TO ALLOW IT TO RUN FREE IF CAUGHT, HELPING TO PREVENT SNAG HAZARDS
- YELLOW CREW OPTION AVAILABLE

The Premier uses a patented "reverse angle head support" to achieve the vital in-water performance.

PREMIER COMPACT

CRUISE & FERRY PASSENGER LIFEJACKET SOLUTION ↓

Since the Crewsaver Premier was introduced in July 2010, the lifejacket has led the way in passenger and crew lifejacket safety.

Driven by regulation changes for lifejacket accessibility on cruise ships, and customer demand for reduced bulk and improved storage options, Crewsaver has designed the Premier Compact - a 49.2% smaller alternative (by volume) to the original Premier.

The Premier Compact provides the crucial, continued safety and performance features of the previous and delivers improved storage options due to its significantly reduced volume and easy-stack profile. A unique design of the neck opening allows for increased wearer comfort, while durability is assured by the use of tried and tested quality components.

FEATURES

- MED APPROVED
- EFFICIENT USE OF STORAGE SPACE AT ONLY 17.4L - 49.2% SMALLER ALTERNATIVE TO THE ORIGINAL PREMIER
- EASY PULL-OUT PILLOW FOR INTUITIVE DONNING
- A FOAM CUT OUT FOR THE BUCKLE ENSURES EASY STACK-AND-STOW, NO FOLDING OR MANIPULATION REQUIRED
- SACRIFICIAL STITCH AT THE END OF THE WAIST BELT TO ALLOW IT TO RUN FREE IF CAUGHT, HELPING TO PREVENT SNAG HAZARDS
- IMPROVED COMFORT AND FIT AROUND THE NECK WITH RE-ENGINEERED NECK APERTURE
- BUDDY LINE AND WHISTLE STORED IN RECESSED POCKET
- HIGH VISIBILITY FABRIC, FOAM AND WEBBING ARE A PROVEN SUCCESS IN THE FIELD
- WAIST BELT DESIGNED TO FIT CHEST GIRTH OF 1750MM
- CLEAR ID WINDOWS FOR VESSEL IDENTIFICATION

49.2% smaller alternative to the original Premier.

SEACREWSADER 275N

SOLAS 275N INFLATABLE LIFEJACKET

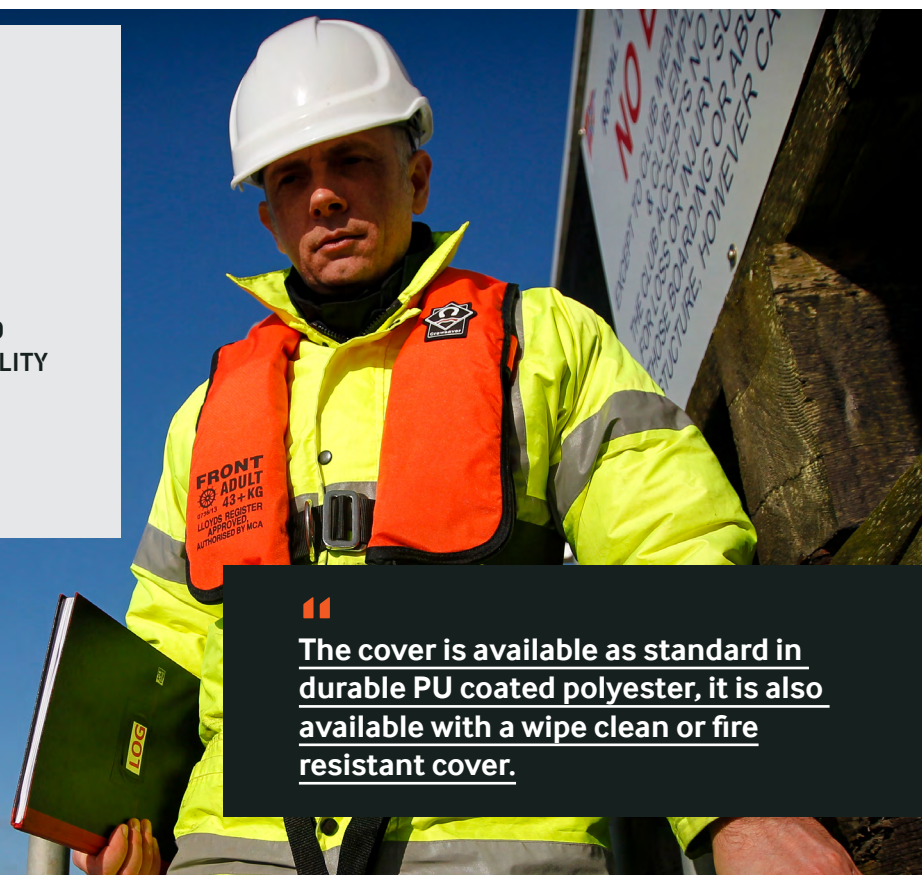

The Seacrewsader 275N Twin is designed to SOLAS 2010 regulations, and outperforms the new requirements to provide increased performance in the most demanding environments. Improved body angle, mouth freeboard and face plane angles make the Seacrewsader even safer at sea. Together with the improved rotating times each chamber is fitted with two 60 g CO₂ cylinders, activated by UML MK5i standard automatic inflation mechanisms* - and a 3.5 psi relief valve to ensure full buoyancy during single or double chamber inflation.

The Seacrewsader 275N Twin is designed for extreme working environments and is also suitable for abandonment purposes. The high buoyancy level provides added protection when heavy work gear and clothing is worn. The new, more compact cover is a robust fabric to withstand the most arduous conditions without damage to the lifejacket and internal bladders. Crotch straps come fitted as standard.

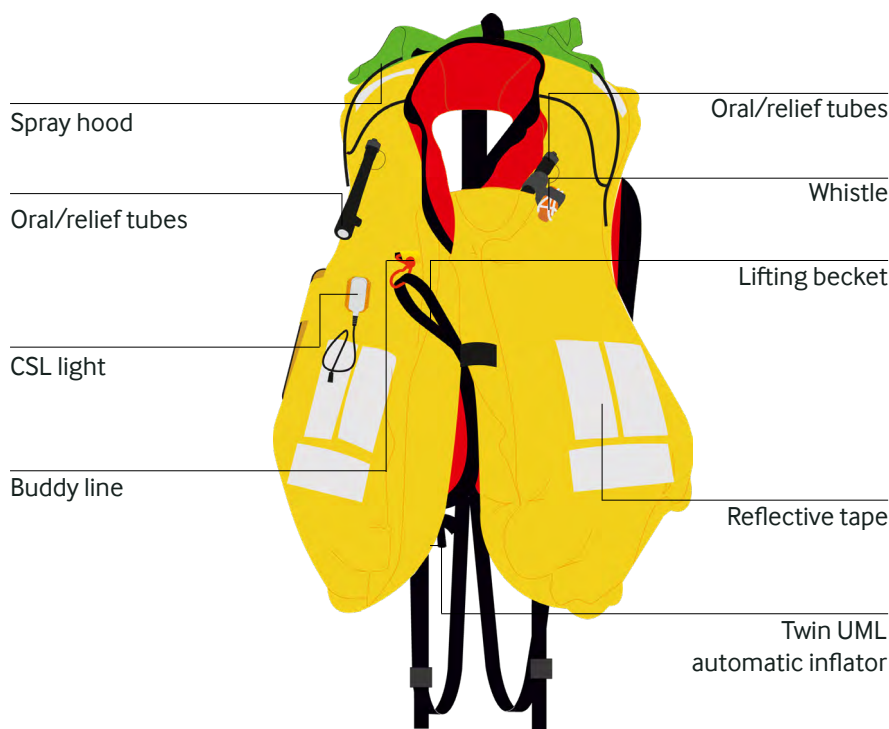

FEATURES

- TWIN CHAMBER 275N MSC 200 (80)/ SOLAS APPROVED LIFEJACKET
- HIGH BUOYANCY LEVEL PROVIDES ADDED PROTECTION WHEN HEAVY WORK GEAR AND CLOTHING IS WORN
- SUITABLE FOR USE WITH MOST IMMERSION AND ABANDONMENT SUITS, SUBJECT TO COMPATIBILITY TESTING.
- ONE SIZE FITS ALL ADULT SIZE
- ALSO AVAILABLE IN HAMMAR INFLATION (SEE CREWFIT TWIN CHAMBER CODES)*

The cover is available as standard in durable PU coated polyester, it is also available with a wipe clean or fire resistant cover.

ROPE ACCESS 3D 275N

INFLATABLE LIFEJACKET ↓

A world first - designed in conjunction with the world's leading offshore operators the Rope Access 3D 275N is the only lifejacket of its kind available to date. Specifically designed for the offshore industry, the Rope Access 3D 275N includes an array of unique key features to aid both the comfort and safety of those operating at height.

The Rope Access 3D 275N encompasses an ergonomic Fusion 3D design giving the user total freedom of movement and unique weight distribution providing the ultimate comfort. Additionally, the lifejacket includes extra features which allow the user to wear the lifejacket with any integrated fall arrest harness - giving the user one complete safety solution.

The heavy duty material maintains longevity whilst a quick burst zip with three burst points helps prevent foreign objects getting inside the operating system.

FEATURES

- RED CROTCH STRAPS TO ENSURE VISIBILITY WITH AN ADDITIONAL PROTECTIVE COVER TO PREVENT TWISTING AND SNAGGING
- REMOVABLE BACK STRAP FOR ATTACHING OPTIONAL FALL ARREST HARNESS
- EASY TO REPLACE WATERPROOF SERVICE LABELS
- FOAM PADDED COVER FOR ADDED IMPACT PROTECTION
- EASY TO REPLACE COVER SYSTEM, ALLOWING YOU TO REPLACE THE OUTER COVER EASILY WHEN REQUIRED. SPARE COVERS CAN BE PURCHASED SEPARATELY INCLUDING FIRE RETARDANT, HEAVY DUTY AND WIPE CLEAN OPTIONS. THIS JACKET COMES WITH THE WIPE CLEAN COVER AS STANDARD
- SOFT PULL TABS HELPING TO PREVENT SNAGGING AND ACCIDENTAL INFLATION
- PLB & AIS READY
- TWIN CHAMBER 275N
- ID WINDOW POCKET
- YKK QBZ TRI-BURST ZIP

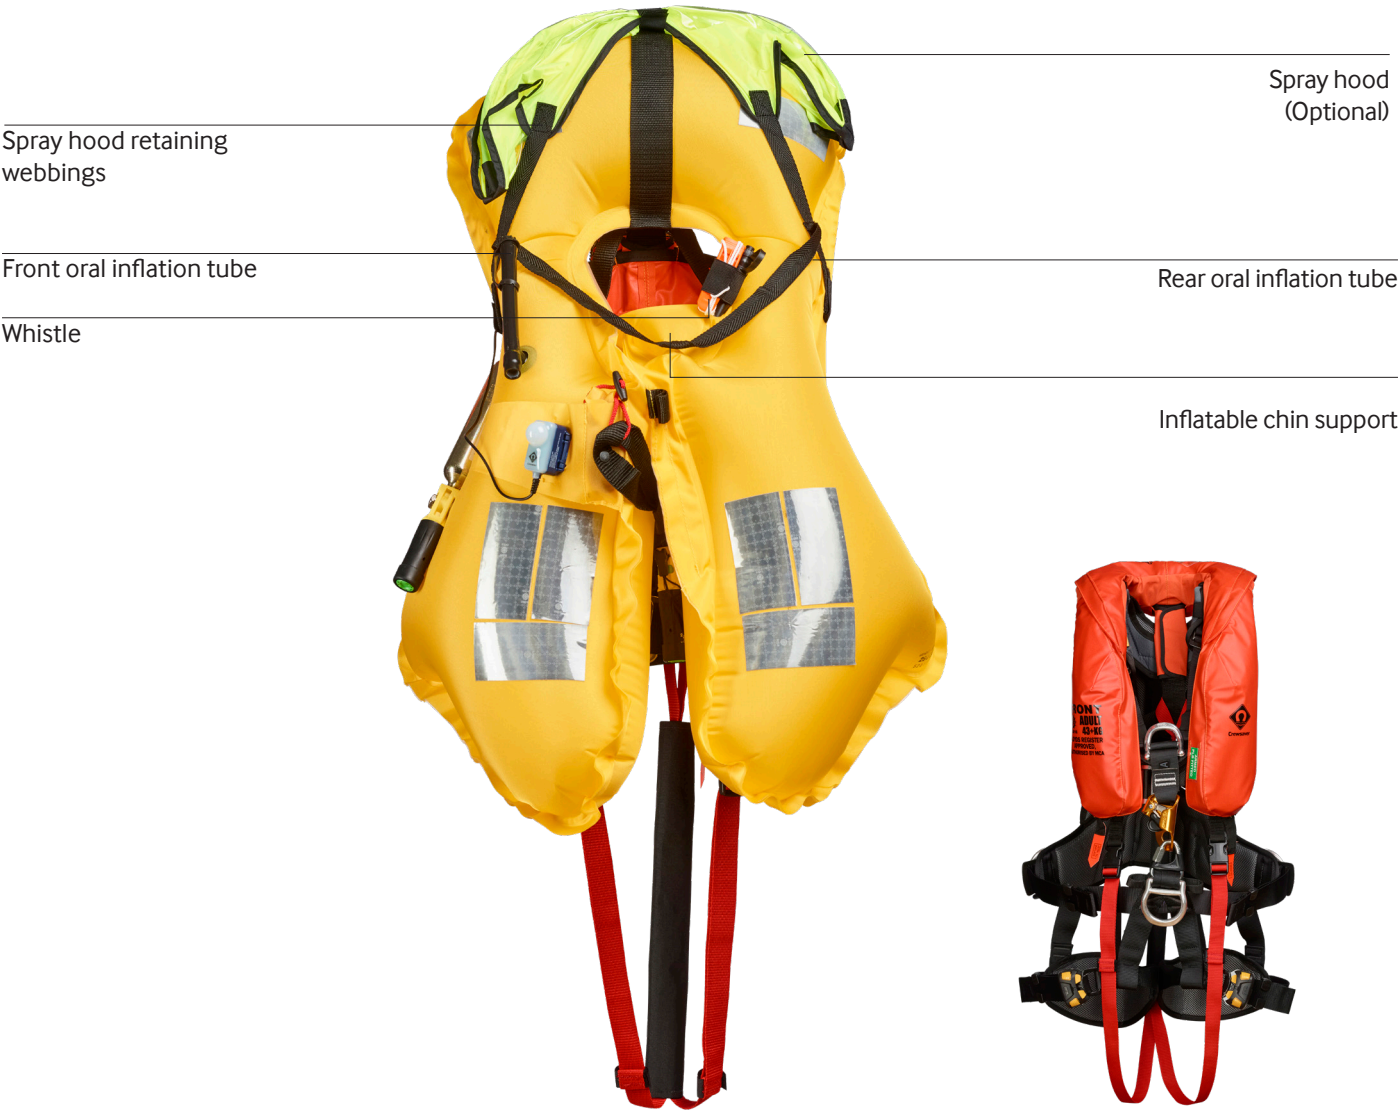

The Rope Access 3D 275N encompasses an ergonomic Fusion 3D design giving the user total freedom of movement.

ROPE ACCESS 3D

275N ↓

Should you unexpectedly fall into the water, you are protected by unbeatable safety solutions. These include an exceptional turning speed, unrivaled freeboard, solas approved light, whistle and reflective tape ensuring you are located quickly, accessible lifting point on the front of the jacket and incomparable chin support helping to keep your airway clear when in the water.

COMPATIBLE WITH A MAJORITY OF FALL
ARREST HARNESSES. DOES NOT INCLUDE
FALL ARREST HARNESS AS STANDARD

SEACREWSADER 290N 3D FIRE RETARDANT

SOLAS APPROVED TWIN CHAMBER LIFEJACKET ↓

Crewsaver's fire retardant lifejackets are a suitable choice for anyone working around extreme heat sources – including welders and those who work with grinding wheels such as construction engineers and mining operatives. The fire retardant cover will protect the internal lifejacket bladder from sparks and embers that can otherwise burn through standard covers to jeopardise the integrity of the lifejacket's function. Designed for extreme working environments and appropriate for abandonment purposes, the Seacrewsader 290N 3D Fire Retardant lifejacket is the right choice for workers based on offshore platforms and vessels operating under SOLAS regulations.

Developed for comfort as well as performance, this ergonomically moulded lifejacket enhances the wearer's freedom of movement, leaving them unhindered to move, work and perform. However, should an emergency arise and the wearer finds themselves in the water, they will discover that the sculpted bladder is designed to inflate quickly and reliably – even when heavy work gear and clothing is worn. The unique buoyancy distribution provides top-of-the-range turning properties to efficiently rotate the wearer to a face up position in the water - whilst further protecting the airway by increasing mouth freeboard and improving both body angle and face plane.

FEATURES

- ERGONOMIC 3D DESIGN WITH DURABLE FIRE RETARDANT COVER
- UNIQUE BLADDER DISTRIBUTION FOR CONSTANT WEAR COMFORT AND ENHANCED IN-WATER PERFORMANCE
- MODULAR COVER SYSTEM - COVERS CAN BE REPLACED IF DAMAGED OR A CHANGE IN APPLICATION IS REQUIRED
- FOAM PADDED COVER FOR ADDED PROTECTION
- ALTERNATIVE COVER OPTIONS AVAILABLE

SEACREWSADER 290N 3D sMRT

SOLAS APPROVED TWIN CHAMBER LIFEJACKET ↓

Designed for personnel operating offshore, the bespoke version of the established Seacrewsader 290N 3D has been developed alongside Marine Rescue Technologies (MRT) to accommodate the Sea Marshall AU9 and sMRT AU10 Personal Locator Beacons (PLB).

The bladder for this lifejacket positions both inflation mechanisms on one side to comfortably accommodate the sMRT PLB on the other. This, combined with the ergonomic Fusion 3D cover, results in a balanced and symmetrical profile to improve overall constant-wear comfort - leaving your workforce unhindered to move, work and perform.

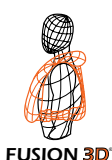

Inspection zips have also been incorporated to each side of the lifejacket - allowing the sMRT PLB to be turned on/off and the inflation mechanisms to be checked without entirely opening the lifejacket. This allows personnel to take ownership of inspecting their inflation mechanisms before donning the lifejacket, to ensure the unit is action ready.

FEATURES

- INSPECTION ZIPS FOR sMRT BEACON AND INFLATION MECHANISM ACCESS
- UNIQUE BLADDER DISTRIBUTION FOR CONSTANT WEAR COMFORT AND IN-WATER PERFORMANCE
- MODULAR COVER SYSTEM - COVERS CAN BE REPLACED IF DAMAGED
- FOAM PADDED COVER FOR ADDED PROTECTION
- CAN BE USED WITH A FALL ARREST HARNESS

A SOLAS approved lifejacket designed
with MRT to accommodate the Sea
Marshall AU9 and sMRT AU10 PLBs

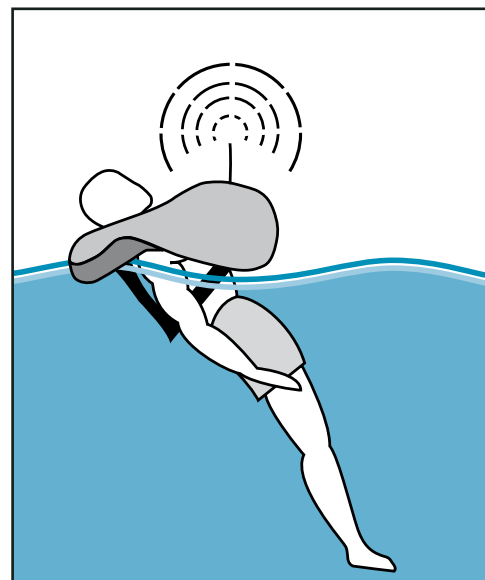

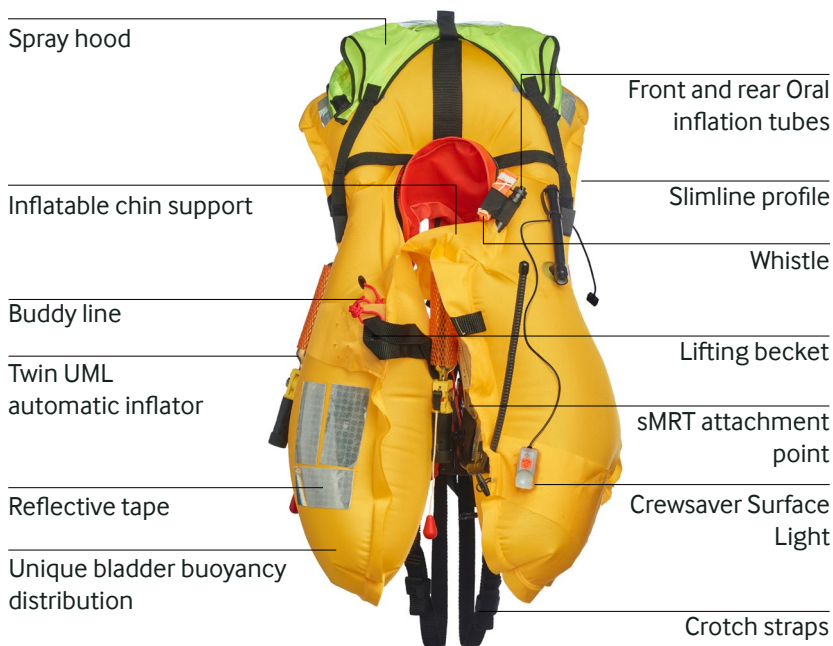

FUSION 3D

SEACREWSADER 290N 3D sMRT ↓

Should an emergency arise, and the wearer finds themselves in the water, they will discover that the sculpted bladder is designed to inflate quickly and reliably – even when heavy work gear and clothing is worn. The unique buoyancy distribution provides top-of-the-range turning properties to efficiently rotate the wearer to a face up position in the water - whilst further protecting the airway by increasing mouth freeboard and improving both body angle and face plane.

The sMRT PLB is encased in a positively buoyant neoprene pouch - allowing the main unit to float free from the lifejacket whilst staying securely attached via the lanyard. This allows the wearer to easily access the sMRT to operate as required.

The lifejacket's sculpted bladder combined with the placement of the sMRT positions the PLB's antenna for optimum performance.
