# EV ISO9650-1 LEISURE LIFERAFT

- ISO9650-1 Approved Liferaft
- New compact and light weight container design
- Extended service period of 3 years
- Can be serviced by our network of over 700 Survitec Group fully approved stations

# SAFETY FIRST

## INTRODUCING EV ISO9650-1 LEISURE LIFERAFT

It is estimated that every year hundreds of leisure crafts get into distress in open, coastal and inland waters. Among the most common incidents are fires, collisions or rogue waves: therefore it is essential you equip your vessel to ensure the safety of all on board.

It is for this reason EV has developed the ISO9650-1 Leisure Liferaft. Based on our renowned SOLAS approved liferaft range, the ISO9650-1 is a cost effective solution developed specifically for the leisure market. Manufactured to the same high specifications synonymous with all EV products, our new sleek, lightweight, compact container takes up little deck space. Meeting the stringent ISO9650-1 standard for inflatable liferafts, the EV ISO9650-1 is the most robust and durable leisure liferaft available on the market today.

# KEY BENEFITS

## Value for money

- Extended service period of 3 years, reducing your on-going costs
- Manufactured from long lasting corrosion and abrasion resistant PVC

## Dependable

- High volume water pockets to ensure maximum stability when inflated
- Simple to close canopy is manufactured to the highest SOLAS standards, providing added protection from the elements
- Semi-rigid boarding ramp allows for quick, easy and safe boarding
- Interior lifelines help occupants stabilise themselves during heavy seas
- Exterior pressure relief valves ensure excess CO<sub>2</sub> is not released into the liferaft
- Vacuum packed into corrosion resistant containers for prolonged durability

## Visibility

- Orange high visibility canopy with retro-reflective panels to help speed up the search and rescue process
- Canopy fitted with internal and external light to ensure optimum visibility

## Flexible

- Available in two packaging options - a weather proof valise or a tough, lightweight container

## Compact

- Revolutionary container design, developed in conjunction with an award-winning design house, is not only aesthetically pleasing but lightweight and compact taking up little deck space
- New design features include handles to ensure ease of manoeuvrability and a document holder to allow the inclusion of important certificates

## AT THE FOREFRONT OF SURVIVAL TECHNOLOGY...

Eurovinil (EV) has been developing and manufacturing inflatable solutions for marine, defence and aerospace applications since 1958. Our experience ensures in-built safety and reliability for each of our products, from initial concept to testing, qualification, manufacture, delivery and in-service support.

Providing essential survival equipment to the Armed Forces and the world's Navies our products are renowned for their sturdiness of design and long product life. Core products include commercial liferafts, leisure liferafts, air beam shelters and a range of specialised technical equipment including splitting cushions, cases for fluid storage and lifting pneumatic bags.

As part of the Survitec Group, EV joins a collection of leading organisations with a history stretching back over 160 years. Commanding market leading positions worldwide in marine, defence and aerospace survival technology, the Survitec Group brings together best-in-class brands with reputations for quality design and innovation.

With a vast servicing network of over 700 Survitec Group approved stations supporting our products worldwide, we can ensure customers have access to a servicing facility anywhere across the globe.
